CAP teacher _____

Career Pathways are broad groupings of career specialties/ occupations that have common skills and knowledge. Career Pathways provide a context for exploring career options at all levels of education and a framework for linking learning to the skills and knowledge needed for future success.

In the next few CAP sessions, you will be provided time to explore each of the six career pathways so that you can make a better decision about the direction you would like pursue. As you meet new people and are exposed to new experiences, your direction may change. That's normal. Career planning is an on-going process, and it starts with you. By making sense of various surveys and understanding how new experiences influence your decisions about your future, you would always understand a **process** of making career decisions should your original plans succeed or falter.

Directions: Use your *Career Pathway Handbook* as you complete the information below to learn and reflect about each of the six career pathways. In your exploration, you will understand the following:

1. Career Pathway description
2. Personal characteristics of individuals compatible with this pathway
3. Cluster, Concentration, and Occupational examples
4. Varying education levels
5. Academic Planning – coursework and co-curricular activities
6. Compatibility
